Write the capacity of each individual container.

1)	3 L = (four cartons)	= _____ mL
2)	900 mL = (three cups)	= _____ mL
3)	48 L = (six bowls)	= _____ L
4)	1 L = (five glasses)	= _____ mL

Liquid measurements

60ml **+** 120ml **=** _____ ml

500ml **+** 500ml **=** _____ litres

30ml **+** 20ml **=** _____ ml

100ml **+** 370ml **=** _____ ml

600ml **+** 220ml **=** _____ ml

Choose the Correct options of the four options given below and put √ on answer.

1.A spoon of Cough Syrup is measured in _____

a)Meter   b) Milliliter   c) Litre   d) Millimeter

2 .A can of Oil is measured in _____

a)Meter   b) Milliliter   c) Litre   d) Millimeter

If each Jug   can hold 2 litres if 1 Bucket = 4 jugs

Then what is the capacity of Bucket in litres ?

5.Daily a person uses a drinking water near about

a)8 spoons   b) 08 buckets   c) 8 Cups   d) 08 Glasses

6. Mahi had 1 lit of water she drunk 250 ml of water her brother drank 150 ml of water how much water is left in her bottle.
a)500ml   b) 1000 ml   c) 600 ml   d) 700 ml

7.The tap is leaking 10 bottles of water of each 1 liter in a day how much water will be wasted in a day.

a)700 Bottles   b) 50Bottles   c) 70 Bottles   d) 60 bottles

8. If 2   Jug can hold 10 litres of water then 5 jugs can hold ___ ?

a)26 litres   b) 24 litres   c)20 litres   d) 25 litres

9. To fill 1 litre bottle Reena needs to pour 200 ml bottle _____ times?

a)7   b) 10   c)5   d) 08

10.1 Injection gives 5 ml of medicine how much a medicine a doctor will inject for 5 days?

a)15ml   b) 55 ml   c)25 ml   d) 35 ml
