ID: _____

“The impact of technology on digital generation”

Technology is a response to man's desire to transform the environment and improve his quality of life. It includes knowledge and techniques developed over time that are used in an organized manner in order to satisfy some need.

The word technology comes from the union of two Greek words: "tekne", which is technique, art, and "logia", which means skill about something.

Over the years, technology has revolutionized our world and daily lives. Additionally, technology for seniors has created amazing tools and resources, putting useful information at our fingertips.

Modern technology has paved the way for multi-functional devices like the smartwatch and the smartphone. Computers are increasingly faster, more portable, and higher-powered than ever before. With all of these revolutions, technology has also made our lives easier, faster, better, and more fun.

Technology has also given us brand new devices in recent decades, like smartwatches, tablets, and voice assistant devices. With these devices, we can do things like transfer money instantly and make purchases for everything from clothes, food delivery, groceries, furniture, and more. Technology has changed how we entertain ourselves, meet each other, and consume all types of media. It's made fun advancements, but it's also made important advancements in safety when it comes to home security and medical devices.

Since there are so many new technologies to keep track of, it can seem overwhelming to adapt. However, all of these new technologies are designed to make your life easier. Even though it may not feel intuitive, learning how to use smart phones, smartwatches and voice assistants just takes a little bit of instruction and practice.

Slide the word into the corresponding sentence

Fun Technology getting faster tools

1-_____ is a response to man's desire to transform the environment and improve his quality of life.

2-Technology for seniors has created amazing _____ and resources.

3- Computers are _____, more portable and more powerful than ever before.

4- With all of these revolutions, technology has also made our lives easier, faster, better, and more _____.

Technology:
