

Drag and drop

The periodic table is color-coded by groups, with labels on the right side:

- Actinide** (Purple)
- Inner transition metals** (Green)
- Alkali metals** (Red)
- Alkaline earth metals** (Orange)
- Transition metals** (Yellow)
- Nonmetals** (Light Blue)
- Metalloids** (Dark Blue)
- Lanthanide** (Light Green)
- Nobel gases** (Dark Purple)
- Halogens** (Dark Blue)

The periodic table itself is organized into rows and columns, with elements labeled by their atomic number, symbol, and name. The groups are color-coded to match the labels on the right.
