READING

A. Number the events from the story in order.

THE CRATERS ON THE MOON

Eddie and Tyler had a science project for school. They wanted to build a model of something in space. First, they went to the library.

"Where is the closest library to your house?" Tyler asked.

"There are three libraries that are close, but the Oak street Library is the closest to my house," Eddie said.

The boys decided to build model of the Moon. They looked at pictures of the Moon from very powerful telescopes. Then they drew sketches of the Moon and its craters.

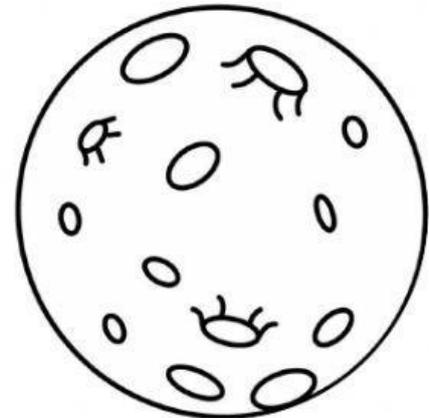

Eddie and Tyler learned that the craters on the Moon are from meteors and comets that crash into it. They watched a video about comets on the website "Ask an Astronomer." Eddie and Tyler learned that comets and meteors are not the same. Meteors are rocks, but comets are ice.

After the library, Eddie and Tyler got a large ball and green paint to make a model of the Moon. Tyler used a knife to make the largest craters.

They painted the ball and put it outside to dry.

The next morning, Eddie went outside to get the Moon model, but it wasn't there! He saw green footprints in front of his house. He followed the footprints up a tree. He saw an opossum eating the Moon model.

Eddie took the Moon model back and met Tyler at school for their presentation. They laughed about the opossum. Then they told the class about how their Moon model got the biggest crater of all!

a. An opossum took the Moon model.

d. Eddie and Tyler told the class about their Moon model.

b. They looked at pictures of the Moon and watched a video about comets.

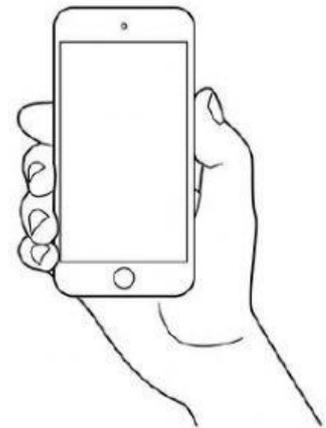

e. Eddie and Tyler went to the library.

c. They made a model of the Moon.

B. Underline TRUE or FALSE

HOW SMART ARE SMARTPHONES?

What makes smartphones smart? All cell phones make calls and send text messages. But smartphones can get the Internet. We use smartphones to get information and answer questions. We use them to read the news. Smartphones are an amazing invention.

Smartphones can do many things. They can talk to your TV. They can tell your TV to record shows. They can even turn the TV off when you're not home.

You can also use smartphones at school. You can use your smartphone on your own or share it in a group. It can help you study and learn new things. Smartphones can also take you on virtual visits to museums, parks, and other places around the world!

Some of the newest smartphones talk to toy cars and toy helicopters! You can use smartphones to tell toys what to do. Both children and adults like to play with these toys.

There are many apps for smartphones made for children. You can play games with your friends or share pictures.

Smartphones are great for all people, young and old. They are fun, they can help, and there are new things smartphones can do every day.

- | | | |
|---|------|-------|
| 1. All phones are smartphones. | True | False |
| 2. Smartphones help you at school. | True | False |
| 3. Smartphones are only for young people. | True | False |
| 4. Smartphones can't talk to your TV. | True | False |
| 5. You can play games. | True | False |

GRAMMAR

A. Write the correct vocabulary word.

B. SHORT AND LONG ADJECTIVES. Fill the gaps with the correct form of the adjective

1. Her dress is _____ (beautiful) of all.
2. English exam is _____ (easy)
3. Morocco is _____ (hot) place.
4. That diamond is _____ (expensive)
5. Jose is _____ (fast) of the class.
6. Coldplay is _____ (popular) band.
7. Punto y aparte is _____ (good) movie.
8. Neptune is _____ (far) planet.
9. That book is _____ (bad) I have ever read.
10. My work _____ (important) here.

C. SUPERLATIVE IN QUESTIONS. Read the answer and write the question.

1. _____
The giraffe is the tallest animal.
2. _____
Dalmatas are the cutest animals in the world.
3. _____
Chile is the longest country in Latin America.
4. _____
Earth is the greenest planet.
5. _____
Elephant are the biggest animals.

D. SUPERLATIVE IN QUESTIONS. Read and write the correct answer.

1. Which is the smallest animal, ladybug or mouse?

2. Which is the farthest planet to Earth?

3. Is Pluto the smallest planet?

4. Is a shark the most dangerous animal?
