

CYBER SAFETY

Handles

Your name is private information that should **NOT** be used. Instead of using your name, it is a good idea for you to create a 'handle' to use while you are online. **'Handles' are AWESOME!** People can communicate with you but not know your real name or who you really are.

Create a unique handle in the box below! Remember, a unique handle can have a portion of your name, other letters, numbers, symbols, or emojis!

A large empty rectangular box with a colorful, multi-colored border, intended for creating a unique handle.
