

HOW TO MAKE A ROBOT

Drag and drop to complete the flow map on how to make a robot.

Later, draw the shapes you need. You may need at least three basic shapes.

Next, sketch your robot.

After that, join the edges of the cube or circles that you have drawn.

Later, you can add details to your robot. You can add eyes using buttons.

First, collect your supplies. You need white card, coloured paper and glue.

Then, cut out the shapes.

Finally, you can create ears or feet for your robot. Your robot is done.

You can paint or wrap them in tin foil.
