# Agriculture

**In conclusion**, agriculture involves much more than the images of farms, fields, and livestock. **In fact**, both producers and farm managers **must** be aware of the effects **that** agricultural production has on natural resources and on living creatures **because these** are the essential element in agriculture, **which** would not exist without **them**.

_____

The term *agriculture* evokes images of farms, fields, and livestock. **However**, **it** involves more than that. The production of food and of other goods for humankind depends on the natural environment. **Hence**, agricultural improvements and **their** impact on the planet, **as well as** the conservation of natural resources and **its** impact on life **itself** have become crucial.

_____

**Secondly**, **since** the soil, the water, and the air are vulnerable to pollution, the agricultural sector **must** keep a healthy environment. **As a result**, **it must** learn where pollution comes from and understand the best practices to protect natural resources. **Besides**, agriculture depends on living creatures. **Consequently**, ethical behavior is particularly important in the agricultural industry.

_____

**In the first place**, we **may** consider food production and agricultural improvements. **In effect**, the history of agriculture has affected **not only** the world's geography, **but also** the world's economies and cultures. **For example**, the production of citrus fruits has been influenced by scientific advances, the weather, and economics.
