## II. Reading Comprehension: Read & analyze the following article. Answer the questions below by choosing the letter of your choice.

Community service is a very important factor when it comes to having a better society. Through my own experiences and observations, I have come to support my opinion on this issue.

My experience that supports this theory involved my job last summer of 2021. I paced around the house for a while. Finally, I decided to sit down and read the newspaper. There was a section on the community which contained a list of volunteer activities. They ranged from helping in soup kitchens to helping as an electrician.

I called a number and decided to spend my time taking care of the grocery shopping of an elderly, handicapped woman. She has since become a good friend. Finally, I was spending my time having fun. I was making a difference in a woman's life. It may not have been in dollars, but the experience and pleasure I gained was more valuable than any amount of money I could have earned.

Even more significant is the value and importance of community through community service in our society. In conclusion, I believe that choosing to support your community through community service should be very important to you. It is also important to the people around you.
