PINK BEACH

Pink Beach or Pantai Merah Muda is one of the beaches in Komodo Island, East Nusa Tenggara. The beach is called Pink Beach because the sand beach is pink. The pink color of its beach is a mixture of white sand beach colors mixed with crushed coral, shells, calcium carbonate from marine invertebrates that are very small, and also Foraminifera, microscopic amoeba that has a red body shell.

At Pink Beach, there are so many marine organisms. No fewer than 1,000 species of fish, 260 species of coral, and 70 species of sponge can be found here. Having so much marine life, this place is a proper spot for snorkeling and diving for sea sports lovers.
