

Complete using the adverbs of frequency.

Always – Usually – Never – Sometimes

### The Middle of the World

In my country there is a monument called "The Middle of the World". This monument is considered one of the most important because, as its name indicates, it is located on the middle of the terrestrial hemisphere. It is \_\_\_\_\_ visited by many tourists. I've seen it a couple of times, \_\_\_\_\_ I think that its structure is so perfect that it stays upright thanks to the gravity that is there. Many people \_\_\_\_\_ say that you can place an egg in there and it will stand up on its own, due to the gravitational force that the hemisphere has developed. I have \_\_\_\_\_ tried it, but I would like to try one day.
