HEDGEHOG - FACTS

(read, look at the pictures & fill the gaps)

Hedgehogs are really They weigh about 1 kilogram. When they walk, they don't leave

(unless the ground is very soft). Most hedgehogs is active during the We say they are nocturnal.

Their don't work very well, but they have very good sense of smell and hearing.

Hedgehogs eat many things, like: insects,,, bird,, berries.

They love meat-based food.

To protect their belly and face from attack, they curl up into a spiky They have around 5000

on their back (also called 'quills') that last around one year but can also be shed when the hedgehog is sick or extremely stressed.

VOCABULARY BANK: ball, cat, eggs, eyes, footprints, frogs, mushrooms, night, small, snails, spikes.
