

Cell Vocabulary 2

What type of cells are these?

These cells are very basic.
They do not have a
nucleus.

ANIMAL CELL

These cells are more
complicated and have
organelles contained by
membranes, which is like a
bag for all of the cell's stuff!

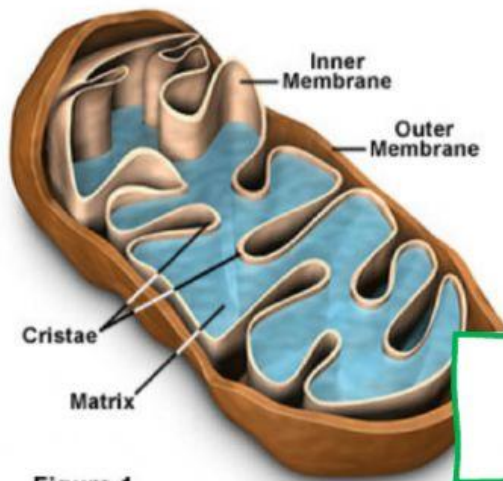

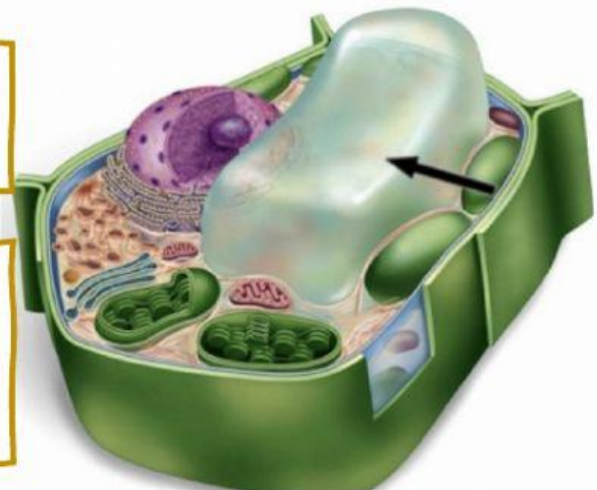

Figure 1

Makes energy. It is the 'powerhouse' of the cell.

Only in plant cells. They take water.

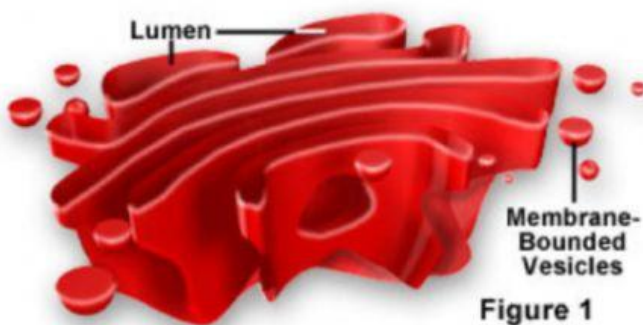

Figure 1

Golgi body.

Takes proteins and sends them to other parts of the cell.

Creates lipids and fat.

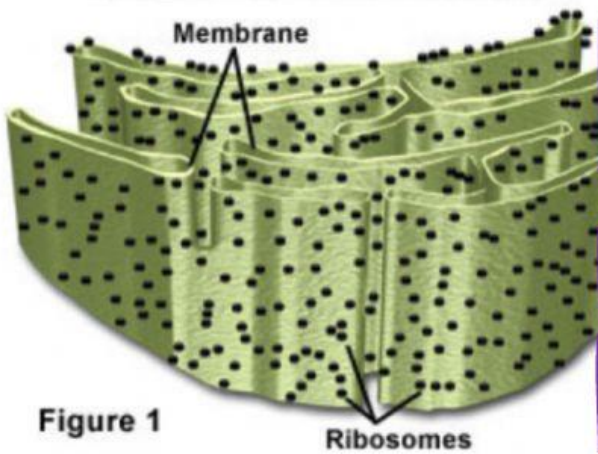

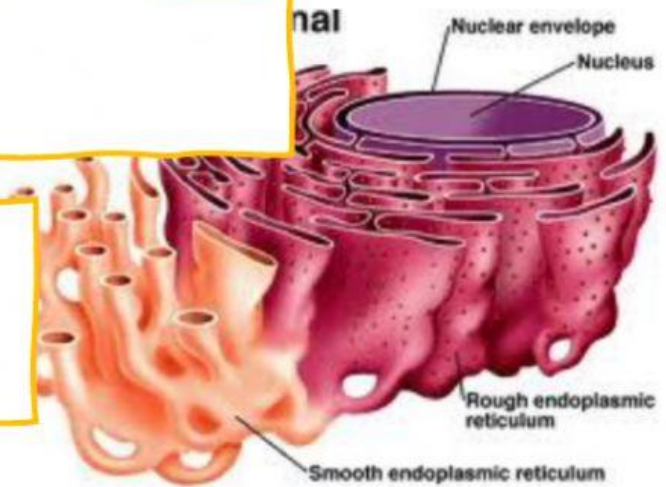

Figure 1

Ribosomes

This is covered in ribosomes and is where many proteins are made.

Creates protein!
