

I. Read the story and write your own version using relative clauses:

Reed Hastings is an American entrepreneur. He was cofounder (1997) and CEO of the media rental service Netflix. He graduated with a bachelor's degree in 1983 in The Bowdoin College in Brunswick. In this university, Hastings learned mathematics and decided to be a math teacher. He returned to the United States and went to

Stanford University. In this place, he received (1988) a master's degree in computer science. In 1997, Hastings conceived the idea of a subscription-based movie-rental service. The same year, DVDs started to be popular. DVDs were selected and controlled by accounts via the Netflix Website. Besides, they were sent and returned by mail. In February 2007, the company launched applications that permitted customers to access movies and TV shows through streaming downloads and Netflix shipped its billionth DVD.
