

Samuel, 27

I think a lot of things will change in 2050. India will overtake China as the first largest economy in the world, but the country will have many problems with its demographics. The world will also have a lot of problems with the pollution and the climate changing. We will need to find other resources, because there will be more than nine billion people on Earth in 2050. We will also need to build spaceships to travel to the Moon and to Mars, because we will have to take resources from these places.
