Homework Week 11 Day 3

Reading Homework:

When the fulcrum is close to an object, the object can be lifted more easily but not as high.

With the fulcrum far away from an object, the object is harder to lift, but it can be lifted higher.

Which question can be answered from the text feature?

a. What causes an object to be lifted more easily when using a lever?

b. Does weight need to be equal when using a lever?

c. How many simple machines are there besides the lever?

d. How is a seesaw like a lever?
