

Reading Unit 1 I can shine 5p

The polar bear live in the Artic. It eats fish and sleeps in a cave. It is always snowy in the Artic. It is cold and wet. There are no trees or plants in the artic but there are a lot of fish in the sea.

In the artic the ice is melting. This is a problem. The polar bears are moving because they don't have shelter. In other places people are cutting trees and birds don't have houses to live.

In the grassland the weather is hotter than in the artic. Lions and cheetah live there with elephants and deers. They eat grass and plants. There aren't fish in the grassland. It is far from the sea.

True or false:

- | | | |
|---|------|-------|
| 1. Polar bears don't live in the artic | TRUE | FALSE |
| 2. They don't eat plants because they like fish | TRUE | FALSE |
| 3. It's hot in the artic | TRUE | FALSE |
| 4. There is more ice in the artic | TRUE | FALSE |
| 5. The bears live in the grassland because it's hot | TRUE | FALSE |
| 6. The artic is colder than the grassland | TRUE | FALSE |
| 7. Elephants live alone in the grassland | TRUE | FALSE |
| 8. Deers eat plants and grass | TRUE | FALSE |

Why do bears are moving to other places?

What do bears eat?

What is the weather like in the grassland?

Why aren't there fish in the grassland?
