How deep can the Trieste bathyscaph dive?

How deep can swimmers dive?

Fascinating Fact

Swimmers holding their breath can swim safely to about 49 feet (15 m) deep. Swimmers wearing SCUBA suits can dive safely to about 164 feet (50 m). The Trieste bathyscaph dove to 35,800 feet (10,911 m) into the world's deepest trench.

HIGH 1133 & WIDG

A photograph of two divers swimming underwater. The water is dark blue. The divers are wearing blue and green gear. The bottom of the ocean is visible in the foreground, showing a sandy and rocky seabed. A search icon is in the top left corner. The text 'Fascinating Fact' is in the top right corner. The text 'HIGH 1133 & WIDG' is written vertically on the right side. At the bottom of the image, there is a row of icons: a globe, a book, a photo, a can, a toolbox, a flashlight, a camera, a clipboard, a hard hat, and a mobile phone.

The is spreading wider all the time as underwater plates move apart and..... rises to fill in the gaps, forming new mountain ranges underwater.

How many inches does the ocean floor spread each year?
