ECOSYSTEMS ON OUR PLANET

The planet earth is the home of animals and people. We all live in different ecosystems. Let's discover our home!

4) _____

What is an ecosystem?

The ecosystem is a community of living and non-living beings in the same environment or area.

All ecosystems are different. Let's see!

Types of ecosystems

TERRESTRIAL ECOSYSTEM

Terrestrial ecosystems are the home of humans, wild animals, and domestic animals. Some examples of terrestrial ecosystems are:

- Forest ecosystem.
- Urban ecosystem.
- Savanna ecosystem.

FOREST ECOSYSTEM

The forest ecosystem is the home of wild animals. Pandas, bears, and foxes are some examples of wild animals in forests.

URBAN ECOSYSTEM

The urban ecosystem is the home of humans and domestic animals. Cats and dogs are some examples of domestic animals.

SAVANNA ECOSYSTEM

The savanna ecosystem is the home of wild animals. Lions, giraffes, and zebras are some examples of wild animals in savannas.
