

1. Label the pictures showing the nervous system

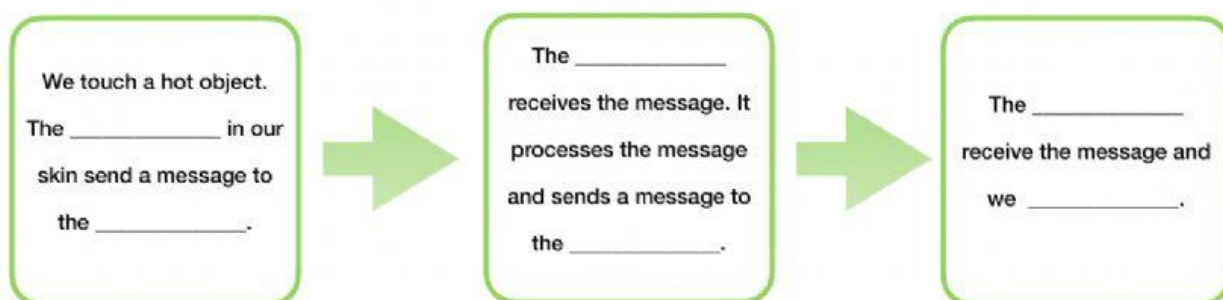

- \* Spinal cord
- \* nerves
- \* brain
- \* brainstem
- \* cerebellum
- \* cerebrum

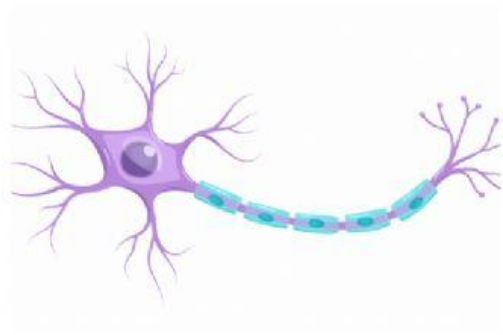

2. Read and write **brain, nerves, spinal cord, or brainstem.**

It sends and receives information to and from parts of the body.	<input type="text"/>
They connect the spinal cord to the muscles, joints and skin.	<input type="text"/>
It connects the brain to the nerves.	<input type="text"/>
It is made up of the cerebellum, cerebrum and brainstem.	<input type="text"/>
It connects the brain to the spinal cord and coordinates messages.	<input type="text"/>
It is made up of nerve tissue, forming a long tube.	<input type="text"/>

3.

Neuron

4. Label the neuron. Then complete the text.

**Axon**

**Cell body**

**Dendrites**

Neurons are \_\_\_\_\_-shaped cells. They have a cell body, a long extension called the \_\_\_\_\_ and short, thin fibers called \_\_\_\_\_. They transmit messages by creating \_\_\_\_\_ impulses.
