**THE SMARTEST ANIMALS IN THE SEA**

Dolphins are adorable, \_\_\_\_\_, and playful creatures. They're also some of the \_\_\_\_\_ animals in the world. They have \_\_\_\_\_ large brains compared to \_\_\_\_\_. The dolphin is also one member of a \_\_\_\_\_ group of species that can recognize their reflections in a mirror. This shows that \_\_\_\_\_ have self-awareness\*, which is a trait associated with intelligence. Dolphins \_\_\_\_\_ communicate with each other \_\_\_\_\_ whistles. They seem to use this type of communication to solve \_\_\_\_\_, which might mean that they have their own \_\_\_\_\_. Dolphins even have individual names. \_\_\_\_\_ dolphin has a "signature whistle" that it \_\_\_\_\_ use to introduce itself. \_\_\_\_\_ are still trying to \_\_\_\_\_ dolphins, but if they really do have their own language, we may be able to communicate with one \_\_\_\_\_.

\* Conciencia de sí mismo

**2. Choose the correct answer:**
