

THE FIVE SENSES: TOUCH

1.- Complete the picture using the words in the box.

TOUCH RECEPTORS

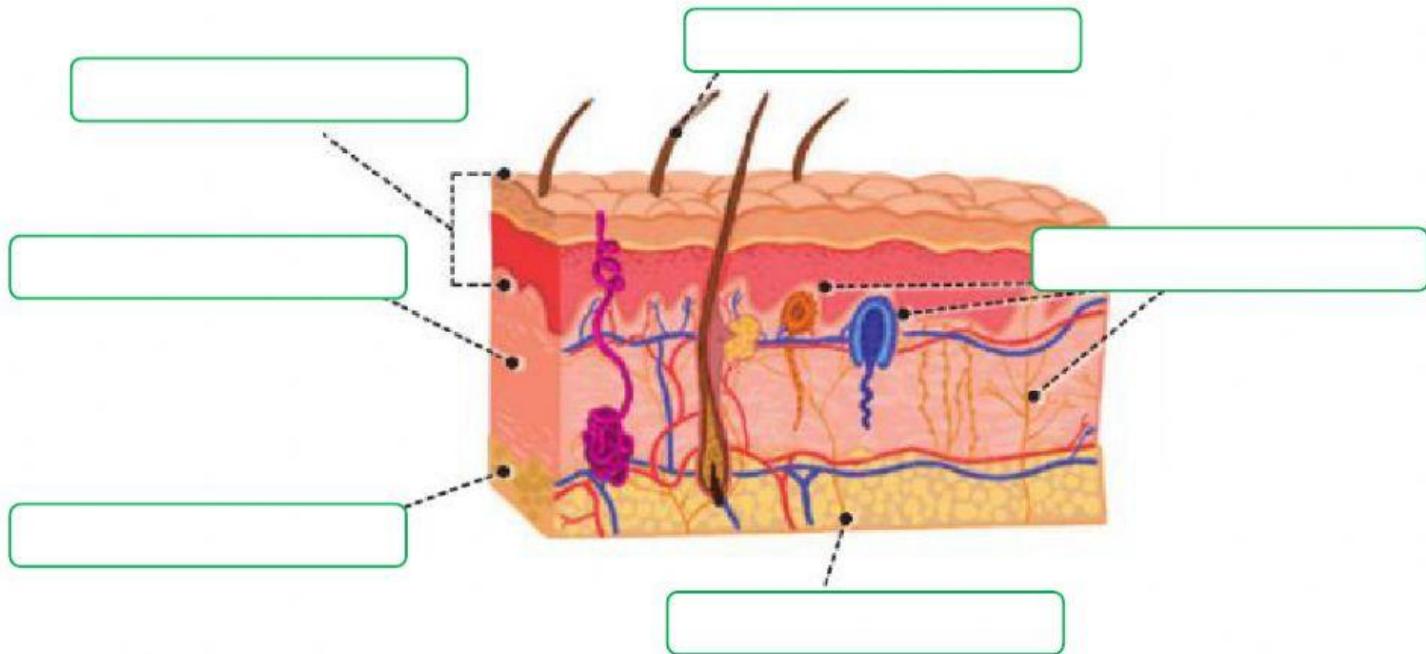

HAIR

NERVE

DERMIS

HYPODERMIS

EPIDERMIS

2.- Complete.

Our skin has three layers.

The **Epidermis** (the outside layer) covers and protects our body.

The **Dermis** contains the nerves, glands and

The **Hypodermis** contains fat tissue and sweat glands.

The **Touch Receptors** detect texture, temperature, pressure and pain, and send electrical signals to the brain.
