

## Natural Sciences. Unit 1. Nutrition and Reproduction.

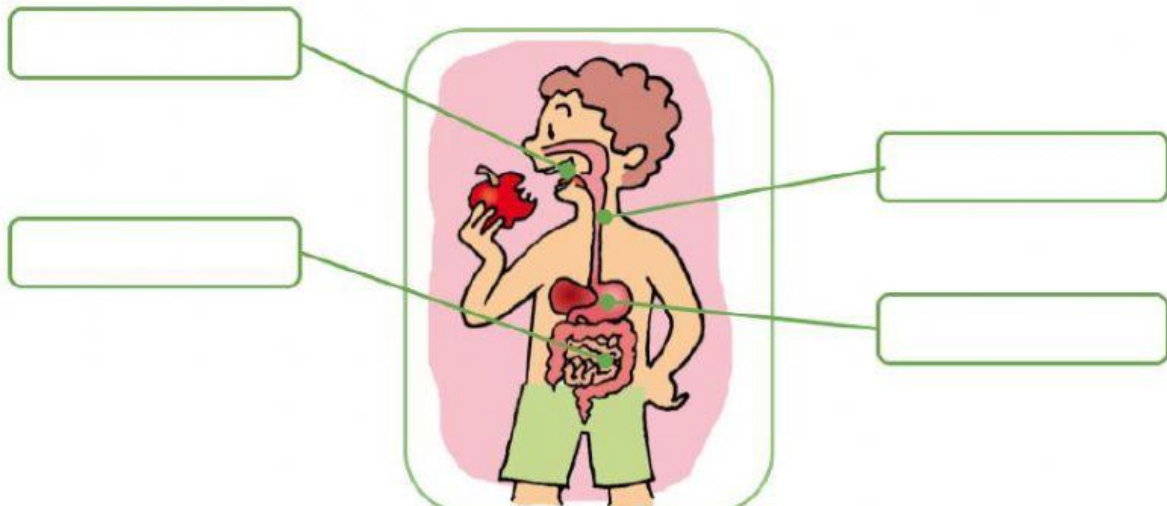

1 Match the system with its function.

- |   |   |
|---|---|
| digestive system <input type="radio"/>    | <input type="radio"/> get oxygen from the air.                              |
| respiratory system <input type="radio"/>  | <input type="radio"/> have babies.  |
| circulatory system <input type="radio"/>  | <input type="radio"/> get nutrients from food.                              |
| excretory system <input type="radio"/>    | <input type="radio"/> eliminate waste products.                             |
| reproductive system <input type="radio"/> | <input type="radio"/> move blood from the heart to all parts of our bodies. |

2 Label the parts of each system.

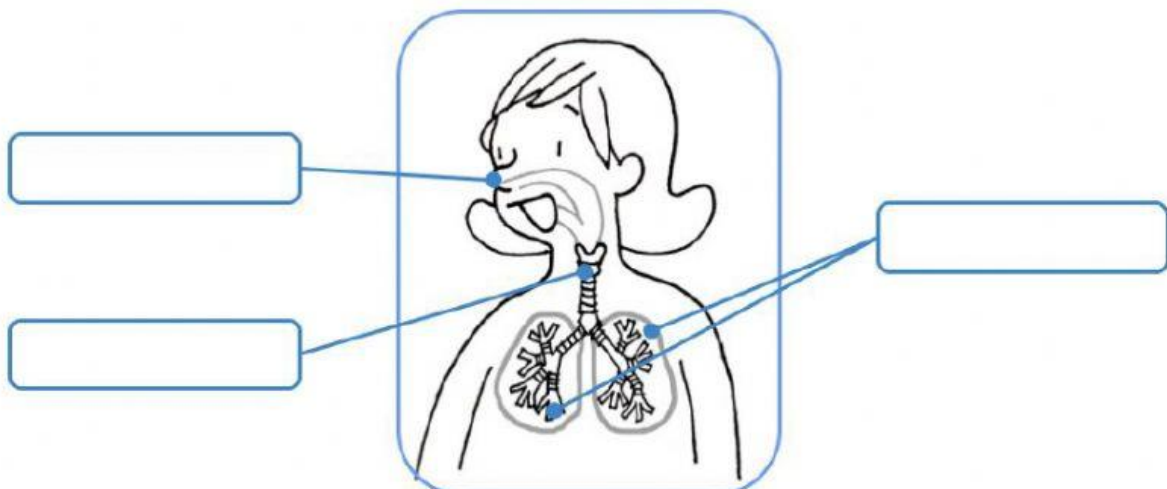

### DIGESTIVE SYSTEM

Our **digestive** system allows us to get nutrients from food.

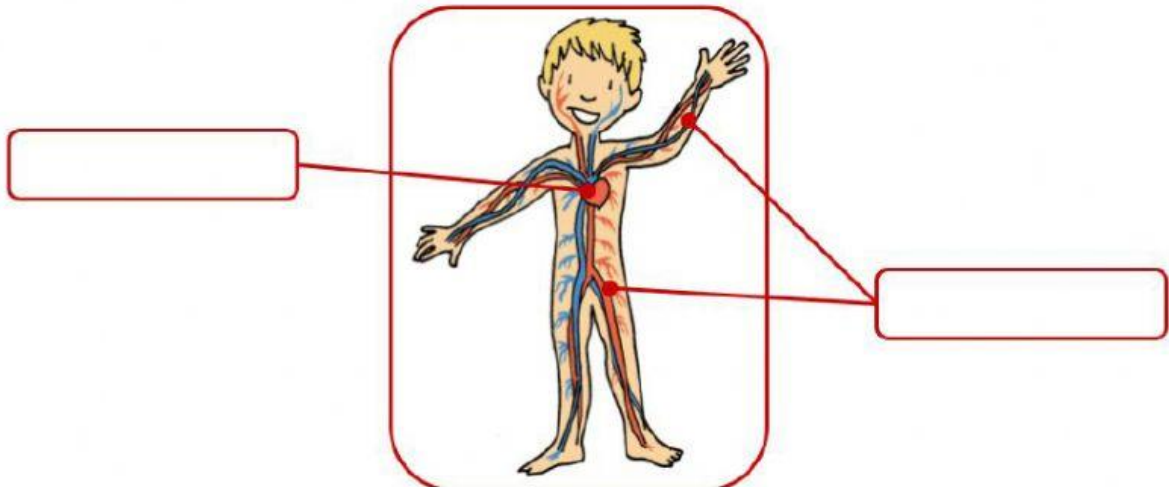

### RESPIRATORY SYSTEM

Our **respiratory** system allows us to get oxygen from the air.

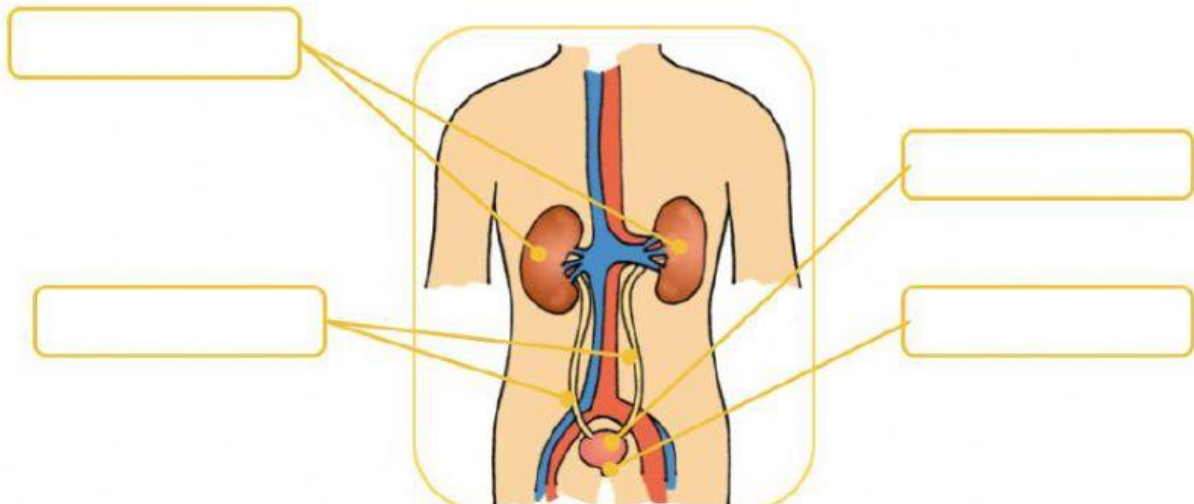

## CIRCULATORY SYSTEM

Our **circulatory** system sends blood from the heart to all parts of our bodies.

## EXCRETORY SYSTEM

Our **excretory** system helps us get rid of waste products.

## REPRODUCTIVE SYSTEM

Our **reproductive** system allows us to have babies.
