Part 1

Read the text and answer the questions.

For each question (**1 – 7**), choose the correct answer *according to the text* **True** or **False**.

There is one **EXAMPLE**

Getting a new pet

I want a hamster because they are cute. They have big ears and little black noses. A hamster also has very sharp teeth which it uses for chewing food. That could be dangerous. It might try to chew my finger!

I think they eat fruit but I'm not sure. I must learn more about them so that I can look after one well. Hamsters are nocturnal and my parents won't be happy if it makes lots of noise playing on its wheel at night. My mother thinks that I won't look after it, but I don't mind the hard work.

EXAMPLE. A hamster has big ears and a little nose. (T) F

1. She thinks hamsters are cute because they do funny things. T F
2. She doesn't like their big teeth. T F
3. She already knows all about hamsters. T F
4. She thinks it is important to know how to look after your pet. T F
5. If her hamster exercises at night, it could be too noisy. T F
6. Her sister thinks she can't take care of pets. T F
7. She doesn't want to do a lot of work looking after her pet. T F

Part 2

Read the text and answer the questions.

For each question (**1 – 7**), choose the correct answer **A**, **B** or **C**.

There is one **EXAMPLE**

Ocean animals.

I really like animals that live in the ocean. I think they are very clever and brave.

I know that penguins don't live in the sea all the time, but they do like to be in the water most of the time. I think they are very cute, and they make me laugh when they walk. A penguin can't fly like other birds because it doesn't have wings. But it does have flippers which it uses to swim very fast. It has to swim fast to catch the tiny fish that try to get away.

There are many animals that eat fish. An elephant seal and a walrus have whiskers that help them find fish. Some fish can change their shape or colour to help them hide from the bigger animals that want to eat them. I think the best camouflage is used by the cuttlefish. It can change from brown to yellow to look like the rocks or sand. Sometimes it even changes its shape so that it can get into any tiny spaces.

When I grow up, I want to be a scientist and study all these strange animals. I want to explore all the oceans in a submarine.

EXAMPLE. He thinks sea animals are _____.

A. quite brave and clever

(B.) really brave and clever

C. not very brave or clever

LIVEWORKSHEETS

8. He thinks penguins are _____.
   A. cute and funny
   B. not cute or funny
   C. cute but not very funny

9. He thinks that penguins _____.
   A. swim to get their food
   B. swim when they are bored
   C. swim to get away from other animals

10. A penguin uses its _____ to move in the water.
   A. feet
   B. flippers
   C. tail

11. Other animals use their _____ to find food.
   A. shape
   B. flippers
   C. whiskers

12. The cuttlefish is best at changing _____.
   A. its size
   B. its shape
   C. its colour

13. He wants to ride in a submarine because _____
   A. he wants to go around the world
   B. he can see the animals better
   C. he likes being in the sea

14. The information tells us mainly about _____.
   A. animals that don't live on the land
   B. animals that use camouflage
   C. animals that eat fish
