to buy a new video game                      to buy recycling bins                      to build a tree house

## READING AND WRITING

3. Read the story.

### Recycling

Recycling is the process of collecting and processing old materials that can be turned into new products. It helps the community and the environment.

A lot of benefits come from recycling: it reduces the amount of garbage sent to landfills; it conserves natural resources; it helps prevent air, land, and water pollution; it saves energy; and it helps reduce greenhouse gases.

The recycling process has three steps, which create a continuous cycle, represented by the recycling symbol: collection and processing, manufacturing, and buying new products made from recycled materials.

4. Read the text again. Circle T for True or F for False. (4 points)

- a. Recycling helps the community and the environment..... T F
- b. One of the benefits of recycling is creating more garbage..... T F
