Flowering and Non-flowering Plants

Remember

Plants can be classified into two main groups: **non-flowering** and **flowering**.

- Non-flowering plants do not produce flowers, seeds or fruit. They reproduce with **spores**. There are two main groups of non-flowering plants: **mosses** and **ferns**.
- Flowering plants produce flowers and seeds in order to reproduce. There are two main groups: **gymnosperms** and **angiosperms**. Gymnosperms do not produce fruit. The seeds are grouped together in cones. Angiosperms produce fruit with seeds inside.

1. Complete the chart:

angiosperms | non-flowering plants | ferns

2. Write angiosperm or gymnosperm:

_____

_____

_____

_____

3. Is it a flowering plant or a non-flowering plant?

pine tree

- ❑ flowering plant
- ❑ non-flowering plant

roses

- ❑ flowering plant
- ❑ non-flowering plant

fern

- ❑ flowering plant
- ❑ non-flowering plant

wheat

- ❑ flowering plant
- ❑ non-flowering plant

moss

- ❑ flowering plant
- ❑ non-flowering plant

apple tree

- ❑ flowering plant
- ❑ non-flowering plant
