PART 4 Reading Comprehension (15 questions)

Read the following passage. Write TRUE if the statement is true, FALSE if the statement is false, or NI if there is no information on this. (5 questions)

A natural disaster is an unpleasant event caused by the earth's natural processes. It has severe consequences for not only many people but also animals and plants. It destroys buildings, leaving thousands of people homeless. According to scientists and environmentalists, worse global warming means there will be more and more natural disasters in the future. There are four types of natural disasters. Geological disasters include landslides and volcanic eruptions, just to name a few. The main hydrological disasters are floods and tsunamis. Typical examples of meteorological disasters are thunderstorms, droughts and tornadoes. Wildfires are the fourth type of natural disasters which are also considered to be caused by humans. The last group, space disasters refer to impact events with meteor and solar flares with large amounts of solar radiation.

Answers	True	False	Not
			given
26. Thousands of people lose their houses after a natural disaster.	☐	☐	☐
27. Natural disasters affect only human beings.	☐	☐	☐
