

SISTEMAS DE ECUACIONES LINEALES

Escriba la solución para cada uno de los siguientes sistemas de ecuaciones.

$$\begin{aligned}x + 2y &= 10 \\2x - y &= 5\end{aligned}$$

$$\begin{aligned}x &= \boxed{} \\y &= \boxed{}\end{aligned}$$

$$\begin{aligned}x - y &= 3 \\2x + y &= 12\end{aligned}$$

$$\begin{aligned}x &= \boxed{} \\y &= \boxed{}\end{aligned}$$

$$\begin{aligned}-2x - y &= 1 \\3x + 4y &= 6\end{aligned}$$

$$\begin{aligned}x &= \boxed{} \\y &= \boxed{}\end{aligned}$$

$$\begin{aligned}y &= 2x + 7 \\-6x - 2y &= -4\end{aligned}$$

$$\begin{aligned}x &= \boxed{} \\y &= \boxed{}\end{aligned}$$

$$\begin{aligned}4x - 2y &= 8 \\3x + y &= 2\end{aligned}$$

Escribe la respuesta en fracción

$$\begin{aligned}x &= \boxed{} \\y &= \boxed{}\end{aligned}$$
