

Converting Length in Metres and Centimetres

Worksheet 2

1 Write in centimetres.

(a) The height of an elephant is 3 m 38 cm.

$$\begin{aligned} 3 \text{ m } 38 \text{ cm} &= \underline{\hspace{2cm}} \text{ cm} + 38 \text{ cm} \\ &= \underline{\hspace{2cm}} \text{ cm} \end{aligned}$$

(b) Peter jumps a distance of 2 m 4 cm.

$$\begin{aligned} 2 \text{ m } 4 \text{ cm} &= \underline{\hspace{2cm}} \text{ cm} + 4 \text{ cm} \\ &= \underline{\hspace{2cm}} \text{ cm} \end{aligned}$$

(c) During a high jump competition, Jack jumped 1 m 52 cm.

$$\begin{aligned} 1 \text{ m } 52 \text{ cm} &= \underline{\hspace{2cm}} \text{ cm} + \underline{\hspace{2cm}} \text{ cm} \\ &= \underline{\hspace{2cm}} \text{ cm} \end{aligned}$$

(d) 6 m 95 cm = cm

(e) 8 m 31 cm = cm

2 Write in metres and centimetres.

(a) A cupboard has a height of 185 cm.

$$185 \text{ cm} = \underline{\hspace{2cm}} \text{ cm} + 85 \text{ cm}$$

$$= \underline{\hspace{2cm}} \text{ m } \underline{\hspace{2cm}} \text{ cm}$$

(b) A whiteboard has a length of 275 cm.

$$275 \text{ cm} = \underline{\hspace{2cm}} \text{ cm} + 75 \text{ cm}$$

$$= \underline{\hspace{2cm}} \text{ m } \underline{\hspace{2cm}} \text{ cm}$$

(c) A flagpole has a height of 750 cm.

$$750 \text{ cm} = \underline{\hspace{2cm}} \text{ cm} + \underline{\hspace{2cm}} \text{ cm}$$

$$= \underline{\hspace{2cm}} \text{ m } \underline{\hspace{2cm}} \text{ cm}$$

(d) 586 cm = $\underline{\hspace{2cm}}$ m $\underline{\hspace{2cm}}$ cm

(e) 904 cm = $\underline{\hspace{2cm}}$ m $\underline{\hspace{2cm}}$ cm
