STUDENT WORKSHEET

How to Maintain a Motorbike	Title
Lots of people get a little lazy about motorcycle maintenance over time. To keep your bike in good running condition, periodic maintenance is extremely important.	Goals
The important thing you need to do is doing specific maintenance tasks. First, check the tire condition regularly. Second, check and top up or replace engine oil. Third, always keep the air filter clean. Fourth, adjust the clutch correctly as needed. Fifth, service your engine regularly. Then, maintain the transmission system. After that, clean the bike regularly. Next, maintain your bike's battery. And then, maintain your brakes. After that, check the fork and fork oil. Lastly, check the sprockets.	Steps including resources
