A journey into space

D Read the text. Choose the right words and write them on the lines.

Our planet

Example

The planet we live on is called 'Earth'. Earth is one of the eight planets that move around round and round the sun.

- 1 Until the twentieth century, we didn't have
2 any really good maps of our planet. But now,
3 special cameras in space can take pictures of
4 Earth so making maps is easy!
5 Most of our planet has water on it so, in
6 pictures, Earth often looks like a big blue and white ball!

- 7 But pictures of Earth don't only help us to make
8 maps. When we look at them, we can also
9 learn a lot about the Earth's environment
10 and weather.

- Travelling in space and exploring other planets
teaches us more about Earth, too.
10 Can you like to design spaceships or to be an
astronaut one day?

- on at in
1 what who that
2 all the one
3 lots any no
4 take taking took
5 Most Every Many
6 looks looking looks
7 they their them
8 too lot some
9 ours us our
10 Can May Would

E Listen and write names, then colour the planets.

Mars Mercury Uranus Saturn Jupiter
