The world of nature

4 The fantastic world of butterflies

Present tense questions

Read the text and write questions with the question words.

For example: How many ...?

How many kinds of butterfly are there?

- 1 When ?
- 2 Where ?
- 3 How long ?

Butterflies

There are about 20,000 different kinds of butterfly. They are easy to see because they have very bright colours. They fly during the day and sleep at night. They live where they can find plants to eat. They do a useful job. They carry the powder – the pollen – which plants make and exchange to grow more plants. Butterflies have a very short life. They usually live for only a few weeks.

5 Animals talk!

Pronouns

Circle the correct pronoun.

- 1 are not the only animals who communicate.
a Him b Us c We
- 2 Other animals communicate in different ways. For example, baby birds open mouths to show that they are hungry.
