

# What time is it?

Pay attention to this clock:

It's two o'clock

It's a quarter to three  
(2:45)

It's a quarter past two  
(2:15)

It's half past two  
(2:30)

1. Now choose the correct time for each clock:

2. Write the time for the following clocks:

1 	2 	3 	1 <i>It's a quarter past <u>twelve</u></i>
4 	5 	6 	2 _____
7 	8 	9 	3 _____
10 	11 	12 	4 _____
			5 <i>It's half past <u>four</u></i>
			6 _____
			7 _____
			8 _____
			9 <i>It's a quarter to <u>two</u></i>
			10 _____
			11 _____
			12 _____

3. Match the clocks with the times. There is an extra time that you don't need.

	<p>It's a quarter to seven</p> <p>It's a quarter to twelve</p> <p>It's a quarter past seven</p>	
	<p>It's a quarter past eleven</p> <p>It's half past seven</p> <p>It's a quarter to twelve</p>	
	<p>It's twenty past five</p> <p>It's three o'clock</p> <p>It's half past four</p>
