

Dear Future students,

Hi, I hope this letter finds you well. I'd like to talk about the time when I decided to become a physicist.

It was a possibility that I would fail because I didn't prepare for my exams, so there was a small chance of passing them. I was so nervous! In the end, I did fail. Therefore, I decided to try for a different class in botany. Botany is the study of plants. This, as it turned out, was a fantastic decision! Sometimes I can be make good choice.

I loved every second of my studies. I also made some lifelong friends and discovered more about myself in the process. I'm currently working through my degree and by the end of next year, I will be fully qualified and ready to live as a successful adult.

Just think, all of this came from me "failing" my original exams. Talk about a successful mistake!

Write soon,

Dave

Activity 1 - Fill in the blanks

1. I decided to try my luck at _____ instead.

- a. law
- b. chemistry
- c. botany
- d. engineering

2. I _____ every second of my studies

- a. loved
