

Classifying & Ordering Real Numbers

The Number Line

Order the following numbers in ascending order

Number One \longrightarrow $\frac{5}{2}$ -2.8 π $\sqrt{7}$ -3

Number Two \longrightarrow $-\sqrt{25}$ $-\frac{22}{4}$ $\frac{3}{4}$ π 0.7

1. Arrange the first set of numbers above by dragging and dropping them below from **Least to Greatest**.

2. Arrange the 2nd set of numbers above by dragging and dropping them below from **Least to Greatest**.

3. **Classify each real number** below by using the drop down menu under them and selecting the type of number.

(a) $-\sqrt{25}$ (b) $-\frac{28}{4}$ (c) $\frac{3}{4}$ (d) π (e) 0.7
