

Date: _____
Name: _____

Instructions: Multiply, following the rules of multiplying by 2-digit numbers.

If $6 \times 9 =$ a 2 digit number place the digit in the ones position under 6 and then place the digit in the tens position on the remainder row to be added to the answer of 6×5 . Repeat for digit in the tens position.

$$\begin{array}{r} 1) \quad 59 \\ \times \quad 46 \\ \hline \end{array}$$

First, multiply 6×9 and then 6×5 .

$$\begin{array}{r} + \quad 0 \\ \hline \end{array}$$

Next, multiply 4×9 and then 4×5 . Place answers on this line.

Finally, add the answers together.

Only use the remainder row if needed.

$$\begin{array}{r} 2) \quad 81 \\ \times \quad 13 \\ \hline \end{array}$$

First, multiply 3×1 and then 3×8 .

$$\begin{array}{r} + \quad 0 \\ \hline \end{array}$$

Next, multiply 1×1 and then 1×8 . Place answers on this line.

Finally, add the answers together.

Instructions: Multiply, following the rules of multiplying by 2-digit numbers.

$$\begin{array}{r} 3) \ 55 \\ \times \ \underline{67} \end{array}$$

$$+ \ \underline{0}$$

$$\begin{array}{r} 4) \ 92 \\ \times \ \underline{27} \end{array}$$

$$+ \ \underline{0}$$

Help Bubble:

First multiply the number in the ones position (the red number) by both top numbers.

Then, multiply the number in the tens position (the blue number) by top both numbers.

Lastly, add them together.
