

A biography

- 1 ☆ Read the text and divide it into four paragraphs.

Ada Lovelace was born in London in 1815. Her mother was a mathematician and her father was a famous poet. They separated when she was a baby. In the 19th century girls didn't usually study math and science, but Ada did. She began to work with Charles Babbage, the father of the modern computer, when she was a teenager. Between 1842 and 1843, Ada worked on an article by an Italian engineer and added her own notes. In fact, many people say the first computer program was in these notes. A few years after this, Ada got sick and died at the age of 36. She was the world's first computer programmer!

- 2 ☆☆ Match the descriptions to your paragraphs in exercise 1.

How she got started _____ Early life and family _____
 Later life _____ What she did _____

- 3 ☆☆☆ Write a biography of a person from history who lived in your city or region.
