

# LIGHT

Do you know how light travels?

Select the missing words from the torch below and fill in the gaps.

Light travels in \_\_\_\_\_ lines from a \_\_\_\_\_ of light, which bounces off an object. We can see the object because the \_\_\_\_\_ enters our eyes. Wood and cardboard are \_\_\_\_\_ objects, which light cannot travel through. \_\_\_\_\_ is a \_\_\_\_\_ material which allows light to pass through. Tissue paper is \_\_\_\_\_ which will let some light travel through.

Light	Opaque	Transparent
Source	Straight	Glass
Translucent
