

IS THE EARTH IN DANGER?

TEST

I. Group up the words according to the columns

tsunamis, droughts, blizzards, tornadoes, hurricanes, floods, earthquakes, hailstorms, heat waves, landslides, fires, ice storm, volcanic eruptions

Land movement disasters	Water disasters	Weather disasters

II. Complete the text with the words

reduce, causes, occur, fires, natural, destroy, accident, guard

This summer there will be a lot of as always during the hot weather. These fires will not only thousands of trees but could destroy homes as well. What are the of forest fires?

Some fires will simply be the result of causes, particularly in hot, dry weather. But this can't explain why fires at other times, when the weather is not so hot. For example, when a fire starts in several different places at the same time, it can't be an; it must be because someone started it.

We can the number of fires by employing more people to the forests, but this can't be something the government can't afford.

III. Write 6-7 sentences about one of the natural disasters
