

ENERGY TRANSFORMATION

First, identify the different devices:

microphone - solar panel - speaker - motorbike - flashlight - gas oven

<p>_?_ energy goes into... →→→</p>	<p>the ?_ and</p>	<p>Is transformed into ?_ energy. →→→</p>
		
		
		
		
		
		

Next, decide what form of energy goes into each device. Use the following forms of energy:

chemical - electrical - thermal - sound - light - kinetic -

Finally, decide what form of energy comes out of each device. Use the following forms of energy:

chemical - electrical - thermal - sound - light - kinetic -
