<b>1</b>	<b>2</b>	<b>3</b>	<b>4</b>	<b>5</b>	<b>6</b>
----------	----------	----------	----------	----------	----------

\_\_\_\_\_ The acids destroy the enamel and create a cavity.

\_\_\_\_\_ Sweet sticky food are eaten and not removed from teeth by brushing.

\_\_\_\_\_ More food is eaten and sticks in the cavity.

\_\_\_\_\_ Bacteria in the mouth feed on the food and produce acids as waste.

\_\_\_\_\_ The cycle continues until the cavity reaches the pulp and causes pain where the nerves are located.

\_\_\_\_\_ Bacteria produce more acids that make the cavity larger.

7. Craig went to the dentist after being in a fight. The dentist put the following information about Craig's dental formula in his chart. Before the fight, Craig had all of his teeth.

LEFT SIDE: I- 1/2    C- 1/1    PM - 2/0    M – 2/1	RIGHT SIDE: I – 0/2    C – 1/1    PM – 2/2    M – 3/3
--	---

a. How many teeth does Craig have currently? \_\_\_\_\_ teeth
