

SUDUT PUSAT DAN SUDUT KELILING

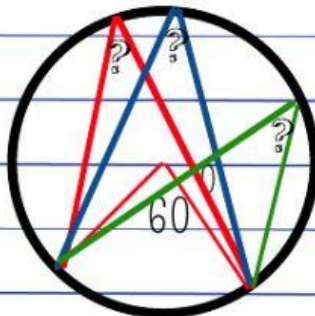

PERHATIKAN SUDUT sudut keliling dibawah ini

SUDUT KELILING ADALAH

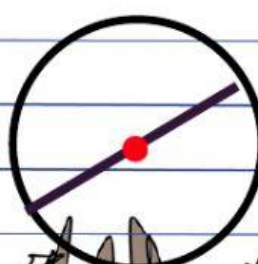

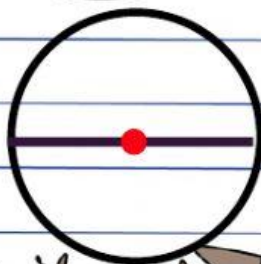

buatlah gambar diatas kemudian buatlah sudut keliling masing masing 3 yang mengapit busur yang sama kemudian tentukan sudut sudutnya

BUAT SUDUT KELILING SESUAI KREASI KALIAN

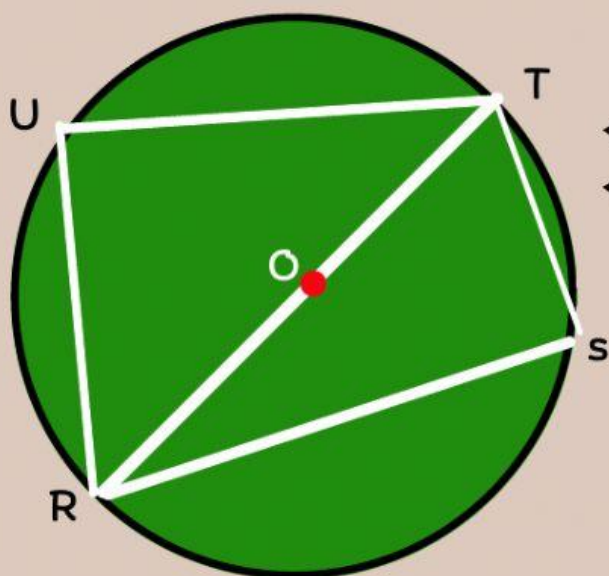

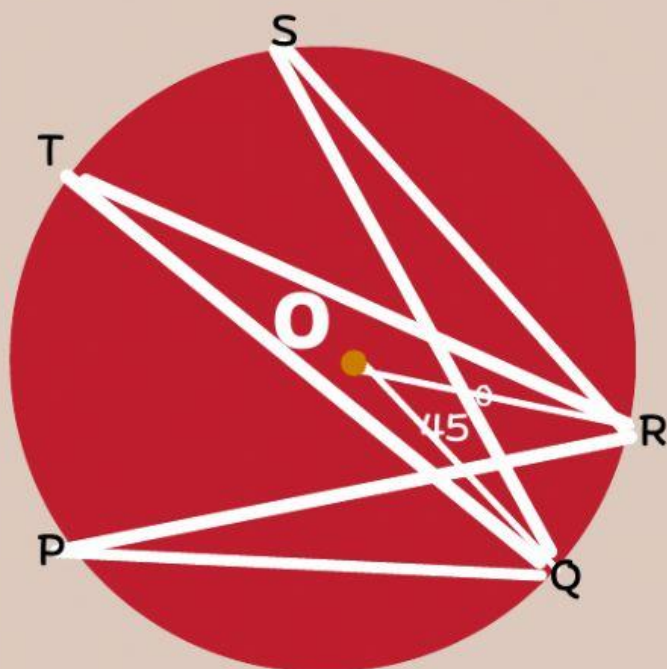

ASAL MENGAPIT BUSUR YANG SAMA SEPERTI CONTOH DI SAMPING

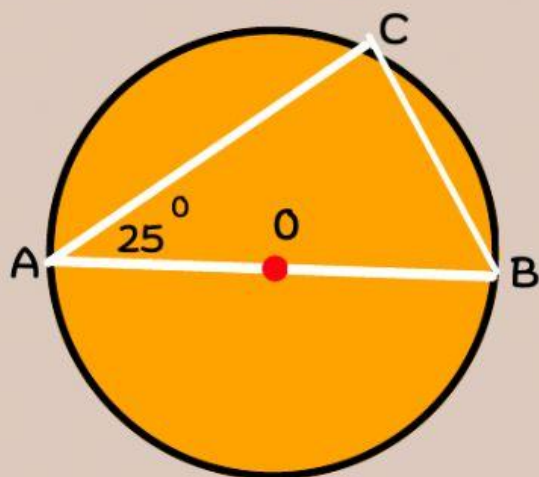

Buat sudut keliling yang mengapit diameter lingkaran

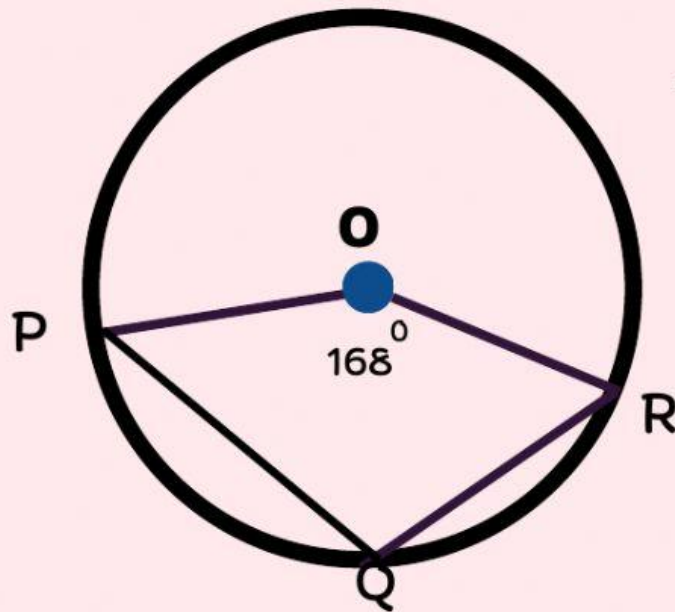

- $\angle QPR = \dots$
 $\angle QTR = \dots$
 $\angle QSR = \dots$

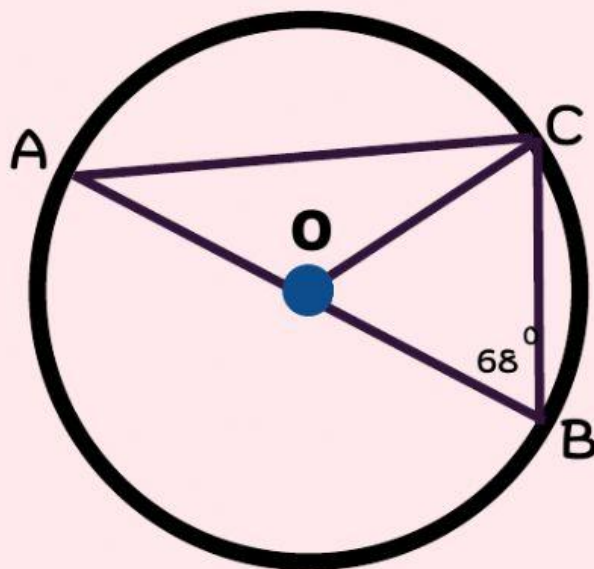

- $\angle RST = \dots$
 $\angle TUR = \dots$

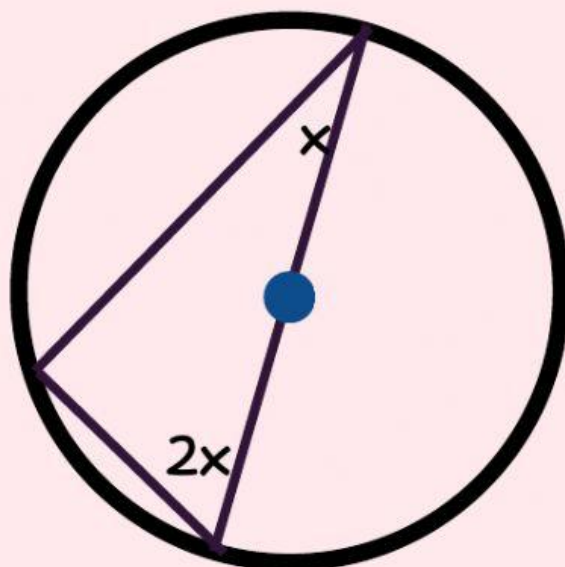

- $\angle ABC = \dots$
 $\angle ACB = \dots$

$\angle PQR = \dots\dots$

$\angle OCB = \dots\dots^\circ$
 $\angle BOC = \dots\dots^\circ$
 $\angle ACO = \dots\dots^\circ$
 $\angle COA = \dots\dots^\circ$
 $\angle OAC = \dots\dots^\circ$

tentukan nilai x

$$\begin{aligned}
 2x + \dots + \dots &= \dots^\circ \\
 \dots x &= \dots^\circ - \dots^\circ \\
 x &= \frac{\dots}{\dots} \\
 x &= \dots
 \end{aligned}$$
