For many people the language of the Internet is English . “ World , Wide , Web : Three English Words ” was the name of an article by Michael Specter in the New York Times a few years ago . The article went on to say : “ If you want to take full advantage of the Internet , there is only one real way to do it : learn English ” .

In general , it is not difficult to learn to use Internet services . But although Internet services are rather easy to use , you will have considerable difficulties if you are not familiar with English . In fact , a good knowledge of English is one of the most important aspects that help you use the Internet .

Learning to use a new Internet service may take a few hours , a few days or some weeks , but it takes years to learn a language so that you can use it fluently and confidently . Of course , when you know some English , you can learn more just by using it on the Internet . But at least your English should be good enough to understand commonly used words and to know what to do on the Internet .
