CRUEL	•	• a person you can trust in.

Three people talking about their heroes.

Jennifer When we say the word hero, we usually think about movies, amazing people with super abilities or something like that. However, when I say the word hero, I only think about my dad. His name is Greg and he is 57 years old. He is kind, generous, patient, and selfless. He always thinks about helping other people. For me, he is the greatest hero! He may not have super strength or super speed, but he has a cool superpower: he saves people. He is a doctor, and he works at a hospital every day. For this reason, he is my hero.

Luke I'm Luke and my hero is someone very special. This person doesn't have any superpower, or cool superhero name, but he has an amazing costume. My hero is called Peter, and he is 12 years old, like me. He is not my brother or my cousin or part of my family, I know him because we go to school together. And the reason why he is my hero? Easy! He is a little different from the rest, because his legs don't work and he needs a wheelchair to move around, but he doesn't let this affect him! He is always in a good mood; he is polite and as a friend he is super reliable! If you're wondering about his costume, he has a cool bright cape that he wears in the back part of his wheelchair. It looks great!

For each question, choose the correct answer:

	LUKE	JENNIFER
1. Who says their hero is their relative?	A	B
2. Who has an adult as their hero?	A	B
3. Who doesn't live with their hero?	A	B
