

LESSON 4. RENEWABLE AND NONRENEWABLE RESOURCES

Natural resources are renewable or nonrenewable?

Renewable resources are those that can be replaced by a natural process given enough time. For example, soil, water, forest, plants, and animals are all renewable as long as they are used wisely and given the time needed to be re-created, regrown, or reused again.

wind

wood

oil

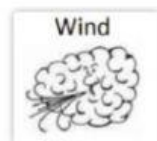

sunlight

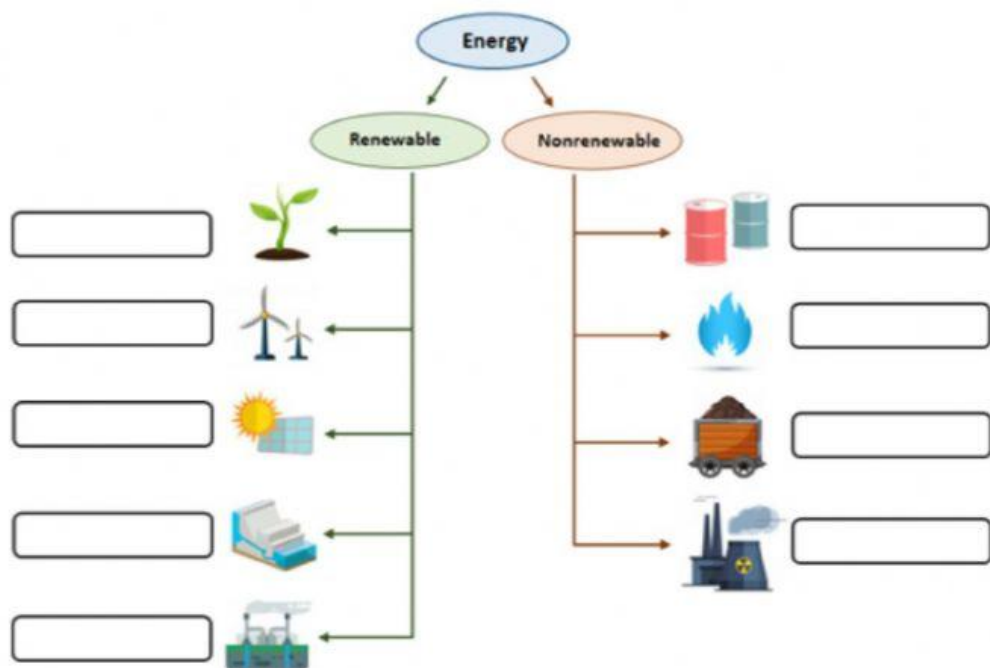

water

metal ore

<u>Renewable</u>	<u>Nonrenewable</u>

OBJECTS	HOW MANY?	Renewable	Nonrenewable
