Read about Mariana. What animals can she see in the forest?

My name is Mariana and I live in Verkhovyna. This is a small town in the Carpathians. My house is near the forest. There are many animals there.

There is a big tree with a nest near my house. A family of storks lives there. They are very pretty birds! But my favourite bird is the woodpecker. It lives in the forest. This bird makes a funny noise!

Some animals are very big and can be angry. You can meet a lynx or a bison in the forest. So my father always tells me: "Don't go to the forest without your parents!"

2 Read and circle.
