

Part 1 Choose the correct answer

Câu 1	Some mushrooms contain a deadly _____
A	Poison
B	Poisoning
C	Poisonous
D	poisoned
Câu 2	Tests should be administered by a medical _____
A	Authority
B	Expert
C	Oncologist
D	Proficiency
Câu 3	A poor diet, with low _____ snacks can lead to
A	nutritious
B	nutrition
C	nutrient
D	nutritional
Câu 4	Some medications cannot be taken orally because their chemical structures are _____ to acidic environment
A	Effective
B	Specific
C	Vulnerable
D	Unwanted
Câu 5	_____ chemistry deals with the design, optimization and development of chemical compounds
A	Medication
B	Medicament
C	Medicinal
D	Medic
Câu 6	Heart _____ is a condition on which the heart cannot pump enough blood to meet the body's needs
A	Failure
B	Fail
C	Fight
D	ailment
Câu 7	All children should be _____ against childhood illnesses
A	Prevented
B	Immunized
C	Fought
D	Injected
Câu 8	A doctor prescribed a _____ of antibiotics

A	overdose
B	course
C	treatment
D	administration
Câu 9	She is _____ to seafoods.
A	allergy
B	allergic
C	sensitive
D	responsive
Câu 10	An _____ is a chemical substance that stops or controls the effect of a poison.
A	antidote
B	aspirin
C	anelgesic
D	antibacteria
Câu 11	The drug _____ will start to decrease as the drug is eliminated.
A	Prevention
B	Parasite
C	Absorption
D	Concentration
Câu 12	Drug can be made as a chemical substances that are _____ in the laboratory
A	Synthesized
B	Synthesis
C	Synthetic
D	Synthesize
Câu 13	A _____ name often has the superscript ® after or before the name to indicate it's registered trade name
A	Chemical
B	Brand
C	Generic
D	Official
Câu 14	FDA has the legal _____ for deciding whether a drug may be distributed and sols
A	Responsible
B	Responsive
C	Responsibility
D	Responds
Câu 15	A _____ is a substance with no effects that a doctor gives to a patient instead of a drug
A	Placebo
B	Pill
C	Lozenge
D	Tablet

Part 2:

A/ Fill in the blank with the suitable words

Drug therapy, also called pharmacotherapy, is a general term for (1) _____ medication to treat diseases. Drugs (2) _____ with receptors or enzymes in cells to promote healthy functioning and reduce or cure illness.
