

**Happy National Paperclip Day!**  
**Let's do some math problems to celebrate!**

1. How many paperclips do you see below?

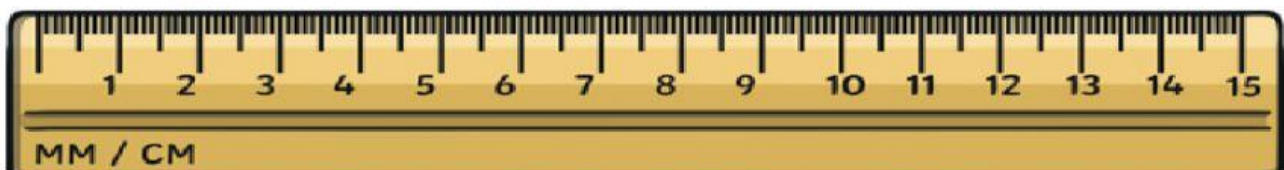

**9**

**6**

**7**

2. How long is this paperclip chain?

**13 cm**

**10 cm**

**15 cm**

3. I printed **100** copies of a notice. I have to group the notices into packets and paperclip them. Each packet must have **20** pages in it. How many paperclips will I need?

You can use a calculator:

$$100 \div 20 =$$

You can draw it out (5 stacks of 20 pages each):

**100 paperclips**

**5 paperclips**

**20 paperclips**
