@Sunee Thailand looks great! The UK is also a brilliant place for a holiday, but it isn't tropical. We haven't got jungles in the UK, but we have got forests. There are lots of beaches around the UK coast, but they are very different from beaches in Thailand! Read this tourist information about the coast in the UK.

Visit the UK's coast!

There are lots of islands around the coast, like the Isle of Wight, the Isle of Man, Guernsey and Jersey. There are many beaches around the coast. There are forests in Scotland. Some forests are next to the beach.

A Blackpool has got a funfair, and it has also got a tower. In September and October there is a light show when it goes dark. It is called the Blackpool Illuminations. It's got over one million lights!

B Some beaches, like Brighton and Llandudno, are more than just beaches. They have got piers too! A pier goes out into the sea from the beach so you can walk over the sea. This is Brighton beach. There is a funfair on the pier!

C There are sand beaches but there are also pebble beaches. Some beaches have got cliffs. This is a pebble and sand beach with tall white cliffs.
