

- ❖ Mostly  with a few trees.
- ❖ Types of trees growing in the savannah depends mostly on  & the  of the sand. The deeper the sand, the taller the trees. Rainwater  the size of trees & grass cover.

- ★ Overgrazing = when there are too  animals in an .
- ★ When grassland is burnt/ overgrazed, the scrubby bushes grow more crowded preventing the grass to grow & making it difficult for animals to move & graze.
