

# Seasons

There are four seasons in a year: spring, summer, autumn and winter.  
The Earth spins around the Sun and the seasons change.

In **spring**, everything is green.  
Trees grow their leaves and plants bloom. Birds sing and many animals have their babies in spring. It is warm and sometimes it is rainy.

In **autumn**, leaves change colour and fall from the trees. Some animals collect food before winter comes. The weather is rainy and windy and the air is cool. Some people call this season fall.

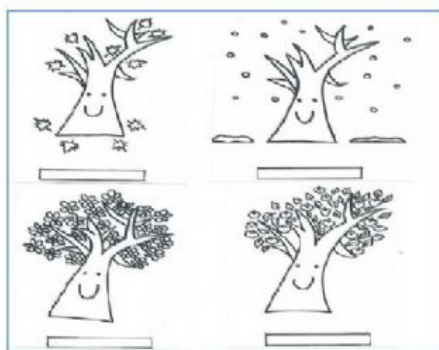

In **summer**, the Sun shines and it is hot. Fruit grows on trees. Days are long and nights are short. Children can play outside, eat ice cream and watermelon. We go to the beach or the swimming-pool.

In **winter**, trees don't have leaves. It is cold and sometimes it is snowy. Some animals, like bats or bears go to sleep. This is called *hibernation*. Days are short and nights are long.

## 1. Write the seasons.

winter	summer	spring	autumn
--------	--------	--------	--------

## 3. True or false? Choose.

There are five seasons in a year.	TRUE	FALSE
In summer we can go to the pool.	TRUE	FALSE
In winter, days are long.	TRUE	FALSE
In spring, flowers bloom.	TRUE	FALSE

## 4. Write a word:

In winter it is \_\_\_\_\_  
In summer we go to the \_\_\_\_\_  
In spring birds \_\_\_\_\_  
In autumn the \_\_\_\_\_ fall.

beach  
sing  
leaves  
cold

## 2. Complete the sentences:

The seasons change when the Earth spins around the \_\_\_\_\_.  
In spring, the weather is \_\_\_\_\_ and \_\_\_\_\_.  
Some people call it autumn and others call it \_\_\_\_\_.
